METRONET

BUILDING FOR TOMORROW.

Yanchep Station

Yanchep Station will be a 49-minute train ride from Perth and will become the heart of Perth's newest strategic business centre.

At the end of the Joondalup Line, Yanchep Station will be located south of the future Toreopango Avenue, north of Yanchep Beach Road, east of Marmion Avenue and west of Wanneroo Road, positioning it centrally to the future Yanchep City Centre's main retail and commercial areas.

Station features

- Two 150m long platforms with 50 per cent covered to provide weather protection or passengers.
- 1000 passenger parking bays and dedicated passenger drop-off area.
- Connected to the project's 13.8km principal shared path.
- Two secure bicycle parking shelters, bike u-rails and the ability to add more as cycling path demand increases.
- 14 bus stands with weather protection, seating and information facilities.
- Public toilets, public services (such as vending machines), passenger ticketing/information, staff amenities, station administration offices, storage/cleaning and operational facilities.

Station design

Yanchep Station's ground-level station entrance, accessible by three entrances, provides access down to the station's two platforms that are built in a cutting below.

The station entrance will also include an 'unpaid zone' allowing pedestrian access from both sides of the rail line. A covered walkway will connect the station entrance with the bus interchange.

The station's forecourt will include feature paving, seating walls, planting, and shade trees where possible. The overall landscape design includes a high level of landscaping within the station car park and surrounding areas.

Station architecture

Local landmarks and early investigations conducted with METRONET's Noongar Reference Group to identify important Noongar themes, such as the *Banksia Menziesii* and neighbouring Yanchep Caves which have influenced Yanchep Station's architecture.

The *Banksia Menziesii* with its orange cone shaped flowers has been chosen to represent Yanchep Station as Banksia is typical of the area and portrays warmth (fire) and nurturing (nectar).

The Yanchep caves are a registered Aboriginal site with their own stories and mythology about their creation and importance to Noongar people.

Station access

A number of new roads will be built to provide vehicle access, with the car park and drop-off area located northeast of Yanchep Station.

Access to the station from the east will be via the bus interchange or local roads. Four zebra pedestrian crossings will allow safe and easy pedestrian access to the bus interchange.

The 13.8km continuous principal shared path running alongside the western side of the rail extension will finish at Yanchep Station. Bicycle storage facilities will be located near the northern and southern entrances of the station building.

Lifts will be located outside the flow of foot traffic, and the station will incorporate audio loops in areas adjacent to passenger facilities to assist the hearing impaired. The station will be fully compliant with the *Disability Discrimination Act 1992* as the project team continues to consult with the METRONET Access and Inclusion Reference Group.

Precinct development

The Yanchep Station precinct covers the majority of the planned Yanchep City Centre, which will be developed on land privately owned by the Yanchep Beach Joint Venture (YBJV).

Conversations with YBJV continue to ensure the station supports the long term vision for the area. Once fully developed, Yanchep will provide a full range of economic and community services. This includes strategic employment and regional facilities to serve the growth planned in Perth's northern corridor.

Take a tour of Yanchep Station 360°

You can now use your phone to 'visit' inside the future Yanchep Station by following these simple steps:

1. If you have an Apple iPhone, simply open your camera app and point at the QR code to scan. If you're an Android user, you will need to download a QR code reader app first.
2. Once the virtual reality has loaded, move your phone around to explore.

About the project

METRONET's Yanchep Rail Extension will extend the Joondalup Line 14.5 kilometres north with new stations at Alkimos, Eglinton and Yanchep.

The project will deliver a 13.8 kilometre principal shared path, nine road-over-rail bridges, three green bridges and an underpass for animals to safely cross the rail corridor. The project is a catalyst for progressive mixed use development around each station that will provide local amenity, services and employment.

The extension will give more than 150,000 future Yanchep-Two Rocks residents another transport option to travel around Perth. With stations planned at Alkimos, Eglinton and Yanchep, early designs show how stations will fit within the planned development areas and cater for passengers on day one of operations.

Find us in your Facebook feed

Our Facebook community group continues to welcome new members! Thanks to every member of the community that has joined the group to keep up to date with the project.

The group keeps the local community updated on project milestones, construction impacts, and general project updates.

To join, simply search 'METRONET Yanchep Rail Extension community group' in the Facebook search bar or type this URL into your browser: *www.facebook.com/groups/yancheprailextension/*
